Alfonso Lara Ramos

Senior AI Systems Architect / Principal Software Engineer

Email: alfonso.lara.ramos.dev@outlook.com | Phone: +52 (449) 544-0605
Location: Aguascalientes, MX (Remote) | LinkedIn: https://www.linkedin.com/in/alfonsolara/

Professional Summary

Senior AI Systems Architect and Principal Engineer with 25+ years designing and building distributed software platforms for fintech, legal-tech, banking, and enterprise environments.

Strong hands-on experience integrating Azure Foundry AI, Cognitive Services, OpenAI APIs, vector search pipelines, guardrail systems, and orchestration frameworks to deliver reliable, production-grade generative AI solutions.

Specialized in high-scale backend services using C#/.NET Core (ASP.NET Core), and front-end applications with Angular and React, alongside Python, Rust, Go, and TypeScript.

Strong OOP with SOLID and clean code practices; advanced C# with generics, LINQ, delegates/lambdas, functional patterns, immutable pipelines, and performance-oriented imperative optimization.

Experienced leading multi-team engineering groups of up to 120 engineers, defining AI architecture roadmaps, establishing delivery standards, and guiding organizations through AI adoption with a pragmatic systems-focused approach.

Core Competencies

AI / LLM	Azure OpenAI, Azure AI Services, OpenAI APIs, RAG with vector databases, guardrails, prompt filtering, output validation, LLM evaluation, hallucination testing and multi-agent orchestration.
Distributed Systems	High-throughput microservices, event-driven systems, task workers, distributed queues, caching, parallel processing, batch pipelines, Kubernetes and CI/CD patterns.
Cloud / Infra	Azure Functions, AKS, Cognitive Search, Form Recognizer, OpenAI, Storage, App Services, Docker, Kubernetes, GitHub Actions, Azure DevOps, IaC, monitoring, logging and cost management.
Engineering	C#/.NET Core, ASP.NET Core, Angular, React, TypeScript/JavaScript, Python, Rust, Go, C++, SQL Server, PostgreSQL, MariaDB, Redis, API design and performance optimization.
Leadership	Technical leadership for large engineering organizations, architecture roadmapping, technical storytelling, coaching senior engineers, mentoring cross-functional teams, and working with VP/C-suite stakeholders.

Professional Experience

ASBN Software - Senior AI Systems Architect / Technical Lead

Aguascalientes, MX - Nov 2019-Present

- Designed and delivered AI-driven solutions using Azure AI, Cognitive Services, and OpenAI APIs for financial, legal, and compliance automation.
- Built RAG pipelines to process and analyze millions of government financial records (SAT/CFDI), reducing manual work by 80%+.
- Implemented multi-agent orchestration for document classification, anomaly detection, data extraction, and legal/financial reasoning.
- Developed backend services with C#/.NET Core, Python, Rust and Go, focusing on reliability, observability and scalability; collaborated on Angular/React UI modules.
- Led engineering teams delivering high-volume distributed systems across fintech and legal-tech environments.
- Implemented secure authentication and authorization flows using Azure Entra ID / External ID, MSAL, OIDC, SSO, app roles and scoped access control.

EY (Ernst & Young) - Principal Engineer, Innovation

Atlanta, GA - Remote from MX - Jan 2018-Oct 2019

- Led 12 global engineering teams (120+ engineers) designing a cloud-native automation and analytics platform for financial auditing and enterprise risk.
- Built large-scale data processing pipelines using Azure, Kubernetes and distributed compute patterns.
- Defined cross-team architectural standards, risk controls and operational guidelines for system reliability.
- Partnered with research and product groups to evaluate and integrate emerging AI technologies into production systems.

Unosquare - Technical Lead

Guadalajara, MX - May 2013-Sep 2019

- Led development teams for banking, fintech and insurance clients, delivering mission-critical systems under strict SLAs.
- Participated in architecture decisions, performance tuning, code quality practices and technical mentorship.
- Built cloud-ready microservices and high-performance backend workloads using C#/.NET and TypeScript; collaborated with teams delivering Angular-based front-ends.

Additional Experience

- Head Architect (External) - DGMXTech (2024)
- Solutions Architect (External) - CICSA (2024)
- Technical Director (External) - iResolve (2019-Present)
- Associate Architect Evangelist - Microsoft (2007-2009)
- Architect / Senior Engineer roles at Softtek, Hildebrando, Emlink, Pounce, SAT, Grupo Alsea

Selected AI & Engineering Achievements

- Designed an AI tax-forensics engine using Azure AI + vector search to analyze millions of financial documents.
- Built a Cognitive Search + OpenAI pipeline reducing financial record review from days to minutes.
- Implemented guardrail and validation layers to significantly reduce hallucinations and incorrect outputs.
- Designed an LLM-driven document intelligence workflow for compliance reports, improving throughput by 14x.
- Migrated legacy automation workloads to containerized cloud environments using Azure Kubernetes Service.

Education

- Bachelor's in Software Development - CENEVAL (Expected Oct 2026)
- Construction Technician - IPN (1999)

Certifications

- Microsoft Certified Solutions Architect (2006)
- Scrum Product Owner - Scrum Alliance (2021)
- Certified Speaker & Coach - Maxwell Leadership (2022)
- SBC Trainer of Trainers - HEC Canada (2022)

Technical Skills

Languages	C# (.NET Core/ASP.NET Core), TypeScript/JavaScript, Python, Rust, Go, Scala, C++
Frontend	Angular, React
AI/LLM	Azure Foundry AI, Cognitive Services, Azure OpenAI, OpenAI API, RAG, Guardrails, Vector DBs
Cloud	Azure (primary), AWS & GCP architectural exposure
Infrastructure	Docker, Kubernetes, Terraform, CI/CD, Observability
Databases	PostgreSQL, SQL Server, MariaDB, Redis
Tools	GitHub Actions, Azure DevOps, Prometheus, Grafana
Security	Hands-on experience with IAM, OIDC, SAML, SSO, RBAC, Azure Entra ID / External ID and MSAL
